|     |                                                                                                                                                                                                                                        |
|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| EN  | As a result of bubbles in the coolant, you might hear sounds coming from your cooler on the first run. Just chill out for 15 minutes and the sounds will disappear.                                                                    |
| AR  | يؤس لشيء ع ام ،مبلوالا قفلا يف ذر.مبل نل اناوصا عيب ذق ،ذيرببلا اقام يف شاقف دو ج و بببببناوصا ااا يف شخببو ققبقا 15 راطننالا.                                                                                                         |
| BG  | Поради балончета в охладителя е възможно да чувате звуци при първото пускане. Просто изчакайте 15 минути и звуците ще изчезнат.                                                                                                        |
| CS  | Při prvním spuštění se mohou z chladiče ozývat zvuky. Je to způsobeno bublinami v chladicí kapalině. Tyto zvuky po 15 minutách provozu ustanou.                                                                                        |
| CHT | 由於冷卻液中存在氣泡，因此初次啟動時可能聽見散熱器發出聲音。這時只要靜待 15 分鐘，聲音即會消失                                                                                                                                                                                      |
| CHS | 冷却液中存在气泡，因此冷却器第一次运行时有可能发出声音。请静候15分钟，声音随后会消失                                                                                                                                                                                            |
| DE  | Durch Bläschen im Kühlmittel macht Ihr Kühler bei der ersten Inbetriebnahme möglicher weise Geräusche. Warten Sie einfach 15 Minuten und die Geräusche verschwinden.                                                                   |
| EL  | Λόγω της ύπαρξης φυσαλίδων στο ψυκτικό υγρό, ενδέχεται να ακούσετε ήχους κατά την πρώτη λειτουργία της ψύκτρας σας. Αυτοί οι ήχοι θα σταματήσουν μετά από 15 λεπτά.                                                                    |
| ES  | Debido a las burbujas en el refrigerante, es posible que escuche sonidos procedentes de su refrigerador la primera vez que lo ponga en marcha. Simplemente, espere 15 minutos y los sonidos desaparecerán.                             |
| FR  | En raison de bulles dans le liquide de refroidissement, vous entendrez peut-être des sons provenant de votre refroidisseur à la première utilisation. Laissez simplement refroidir pendant 15 minutes pour que les sons disparaissent. |
| KR  | 냉각수에 거품이 있으면 최초 작동 시 쿨러에서 소리가 날 수 있습니다. 이 경우 15분 동안 냉각시키면 소리가 사라집니다.                                                                                                                                                                   |
| KZ  | Салқындату сұйықтығының ішінде көпіршіктердің болуына байланысты, салқындатқышты алғаш рет қосқан кезде дыбыстар естілуі мүмкін. 15 минут бойы күтіңіз, дыбыстар басылады.                                                             |
| HU  | A hűtőfolyadékban levő buborékok miatt hangokat hallhat a hűtőből az első indításkor. Hagyja hűlni 15 percig és a hang megszűnik.                                                                                                      |
| ID  | Dikarenakan gelembung udara di pendingin, anda mungkin akan mendengarkan suara pada pendingin yang dinyalakan pertama kali. Tunggu selama 15 menit, suara tersebut akan hilang.                                                        |
| IT  | Se sono presen el liquido refrigerante, al primo uso è possibile che la ventola emetta un rumore. Attendere 15 minuti e il rumore scomparirà.                                                                                          |
| JP  | 初回運転時、冷却液に含まれる泡が原因でクーラーから音が聞こえることがありますが、15分ほどそのままにしておくと言は消えます。                                                                                                                                                                         |
| NL  | Door luchtbellen in de koelvloeistof, hoort u bij het eerste gebruik geluiden van de koelventilator. Als u 15 minuten geduld hebt, zullen de geluiden verdwijnen.                                                                      |
| PL  | Przy pierwszym uruchomieniu pęcherzyki powietrza w środku chłodzącym mogą powodować słyszenie dźwięków dochodzących z elementu chłodzącego. Po 15 minut dźwięki zanikną.                                                               |
| PT  | Na primeira utilização, poderão ser emitidos ruídos provocados pela existência de bolhas de ar no refrigerante. Aguarde um pouco, os ruídos desaparecerão após 15 minutos.                                                             |
| RU  | Вследствие наличия пузырьков воздуха в охлаждающей жидкости при первом использовании кулер может издавать шум. Дайте кулеру поработать 15 минут, чтобы этот шум прекратился.                                                           |
| SR  | Usled prisustva mehurića u rashladnoj tečnosti, moguće je da ćete pri prvom pokretanju čuti zvukove koji dopiru iz hladnjaka. Samo isklirajte 15 minuta i zvukovi će nestati.                                                          |
| TR  | Soğutucudaki kabarcıkların bir sonucu olarak, ilk çalıştırılma da soğutucunuzdan çıkan sesler duyabilirsiniz. Yalnızca 15 dakika sonra sesler kesilecektir.                                                                            |
| UA  | У результаті утворення бульбашок у хладагенті під час першого запуску можуть виникати певні звуки. Просто зачекайте 15 хвилин, і звуки зникнуть.                                                                                       |
